120 RECORD FPS

- Central Management Software
- Smooth Video and Audio over the Internet
- User Friendly Interface
- Rock Solid Stability
- Easy AVI video Backup
- POS or Door Access Transaction Recording and Search (POS Data cable required sold separately / VIRD Series door access only)

DVS 9240 DVR System / 16 Ch Video / 240 FPS Display / 240 FPS Recording / MPEG4® or H.264® High Compression CODEC Remote view over the Internet

DVS 9120 DVR System / 16 Ch video / 120 FPS Display / 120 FPS Recording / MPEG4® or H.264® High Compression CODEC Remote view over the Internet

DVS 9240 is one of our best performing DVR systems from our product line. It supports up to 16 video channels with a crystal clear high-res picture quality and a maximum 240 frames per second. The high compression MPEG4® or H.264® CODEC provides more recording time with the same size hard disk drive than the previous generation CODEC. The built-in video motion detector logic helps the DVR system from storing unnecessary video. By connecting the DVR to the Internet, you are able to view live or archived videos from a remote location. Or you can connect to multiple DVR's from different locations and view them all at the same time.

DVS 9240

- 16 channel video input
- 8 channel audio input
- 240 fps Display frame rate
- 240 fps Record frame rate

DVS 9120

- 16 channel video input
- 4 channel audio input
- 120 fps Display frame rate
- 120 fps Record frame rate

- MPEG4® or H.264® high compression CODEC
- D1 / Half-D1 / CIF Resolution
- Pentaplex Operation (Live / Recording / Playback / Network / Backup)
- HDD Installation available up to 4TB
- Client software is compatible with Microsoft® Windows Vista™ and Windows 7™
- Tower Case or Server Case
- Central Management Software (CMS) included
